

# Solutions for **SAP** platform **WHINT** PaymentReporting

WHINT PaymentReporting Ingenico is a Turn-key Integration Solution of Whitepaper InterfaceDesign which seamlessly integrates Ingenico ePayments reporting data into SAP FI. It enables the merchant to process and reconcile payment processing data and match it with his transactional order-related data in SAP Finance.

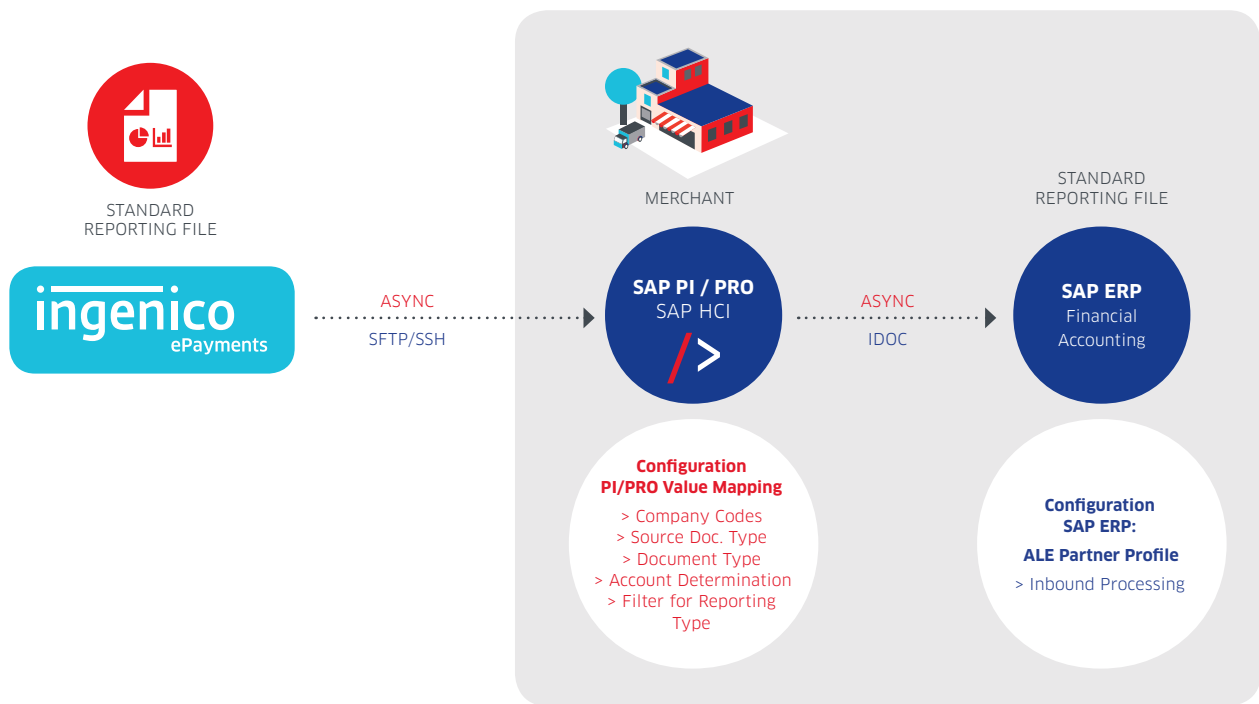

## About whitepaper.id GmbH

Whitepaper InterfaceDesign connects SAP landscapes & business processes through simplified automation of system- and application integration by providing Integration Solutions as well as Consulting Services. As an SAP Application Development Partner our focus is on SAP middleware-related integration technology, interfaces, cloud integration and business process modeling.

Our On-Premise and Cloud Solutions for SAP Process Orchestration (PRO) and SAP HANA Cloud Integration (HCI) are SAP certified and provide value to your clients as Middleware Add-ons and Turn-key Integration Content.

For more information, please follow [blog.whint.de](http://blog.whint.de)

#### Integration explanation:

Enabling the automatic Processing of the Collection Appendix Report as SAP FI documents with state-of-the-art integration technology.

No changes or developments are needed on SAP ERP side, only a few configuration steps are required (ALE IDoc inbound processing).

Other Reports (Financial Statements) can be picked up automatically as well and e.g. sent via E-Mail.

Available as an On-Premise Edition (for SAP PI/PRO) via software licence as well as a Cloud Edition (for SAP HCl) via software subscription

#### Features & Payment products support:

Secure Communication to Ingenico's SFTP Server.

Flexible Configuration on SAP's Middleware:

- a. Account Determination
- b. Company Code Mapping
- c. Reporting Types
- d. Document Types

Integrates with Ingenico ePayments Reporting Model

Automatic processing of Collection Appendix Report

Other Report Types can be transported into merchant's landscape
