

Payment solution for Credit Card Vault Platform **Spredly**

Ingenico ePayments partner with Spredly to facilitate many types of online payments, eCommerce, in-game credit purchases.

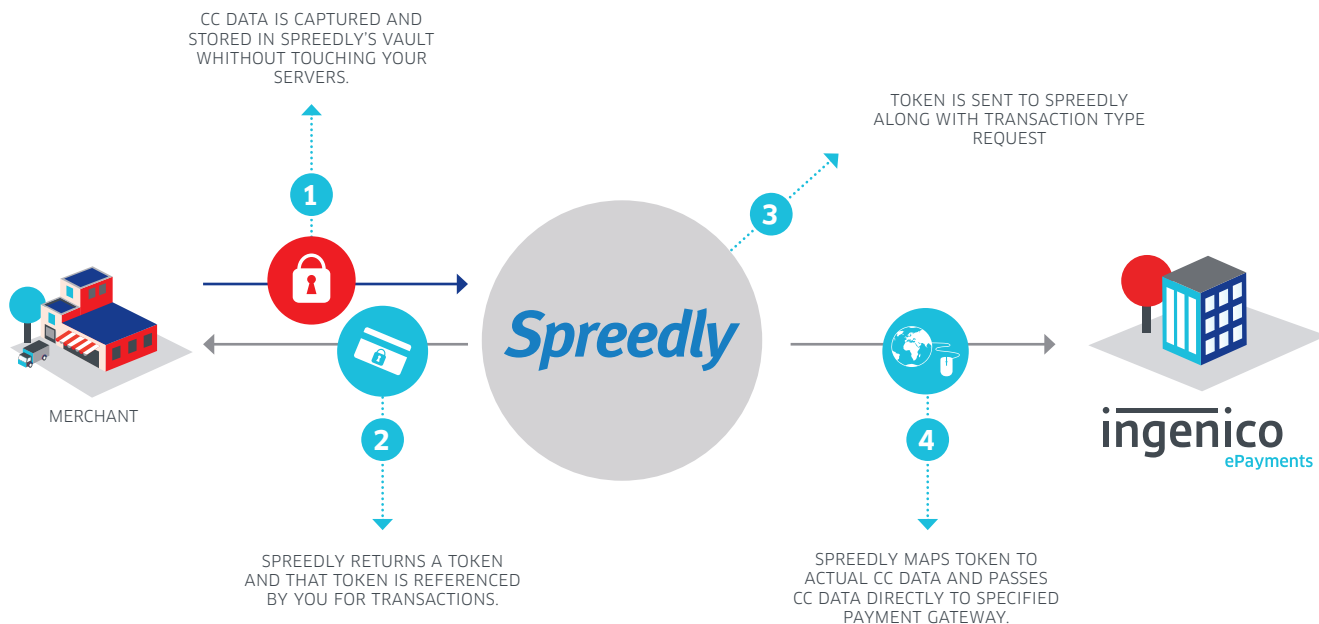

About Spredly

Spredly is a service that allows merchant to securely store credit cards and use them to transact against any number of payment gateways and third party APIs. It does this by simultaneously providing a card tokenization/vault service as well as a gateway and receiver integration service. Spredly is a SAAS payment platform designed for marketplaces and platforms. Their value is a modern set of APIs used by clients to:

- Dramatically reduce PCI scope
- Store and tokenize payment methods that are reusable across platform
- Work with the payment endpoints of choice or necessity via a single point of integration.

Marketplaces and platforms, in particular, use Spredly to sell a solution/service into an install merchant base and do not always want to force the merchant to change payment processing to win the deal. Spredly eliminates payments as a friction point in their sales process.

Scalable, secure and reliable

Whatever your expansion strategy is, a secure technology backbone allows you to grow with confidence. State-of-the-art data centers across the globe are readily available for you to plug into. We ensure optimal performance, security and uptime even during seasonal peaks, so you can focus your resources on your strategic initiatives.

Superior growth, superior economics

Launch new sites faster, across channels, geographies and brands without purchasing additional licenses and investing in more infrastructures to support your growth. Our pricing model is predictable, transparent and aligned to your business goals. This keeps us focused and accountable to your ongoing success. There are no hidden fees. No surprises. With a total cost of ownership that is half the cost of licensed software, the superior economics are clear.

Supported transactions:

Purchase: make a purchase with a given payment method against a gateway

Authorize: Authorize a purchase (but do not transfer any funds) with a given payment method against a gateway.

Capture: capture the funds previously reserved via an authorization

Credit (Refund): Credit funds back to a payment method used in a previous transaction

Void: Cancel out authorizations and, with some gateways, actual transactions within the first 24 hours.

Verify: Ask a gateway if a payment method is in good standing

Supported credit card:

- Visa
- Master Card
- American Express
- Discover
- JCB
- DinersClub
- Dankort
